The application has been amended as follows:

In the Specification:

Page 1, delete the brackets in the heading as follows: change "[Field of the Invention]" to -Field of the Invention--;

Page 1, second heading delete the brackets around "Background of the Invention";

Page 2, delete the brackets around the headings "Disclosure of the invention" and "Problem to be solved by the invention";

Page 6, delete the brackets around the heading "Best Mode For Carrying Out the Invention";

Page 14, line 18, change "rear stage drum part 1a" to -rear stage drum part 1b--;

In the Abstract:

Link line 4 to line 5 to form a single paragraph :

2. The following is an examiner's statement of reasons for allowance:
The closest prior art of record is Frykhult (US 5685983) in which guide members 18 are distributed around the drum filter 1. The members 18 define filtrate receiver chambers between successive members. There is no disclosure in Frykhult '983 to suggest the presence of a filtrate sucking force directed toward the inside of the filtrate receptive chamber caused by the discharge of the filtrate. The radially oriented members 18 of Frykhult

'983 define an entirely open "chamber" which cannot accumulate any filtrate nor cause a sucking force.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
